Introducción

Se realizaron pruebas sobre el sitio "Itch.io" un Marketplace para creadores digitales independientes con un foco en videojuegos. A continuación adjunto las capturas de pantalla para facilitar el entendimiento de los casos de prueba. Al final se realizan conclusiones sobre el estado de la página.

Casos de prueba

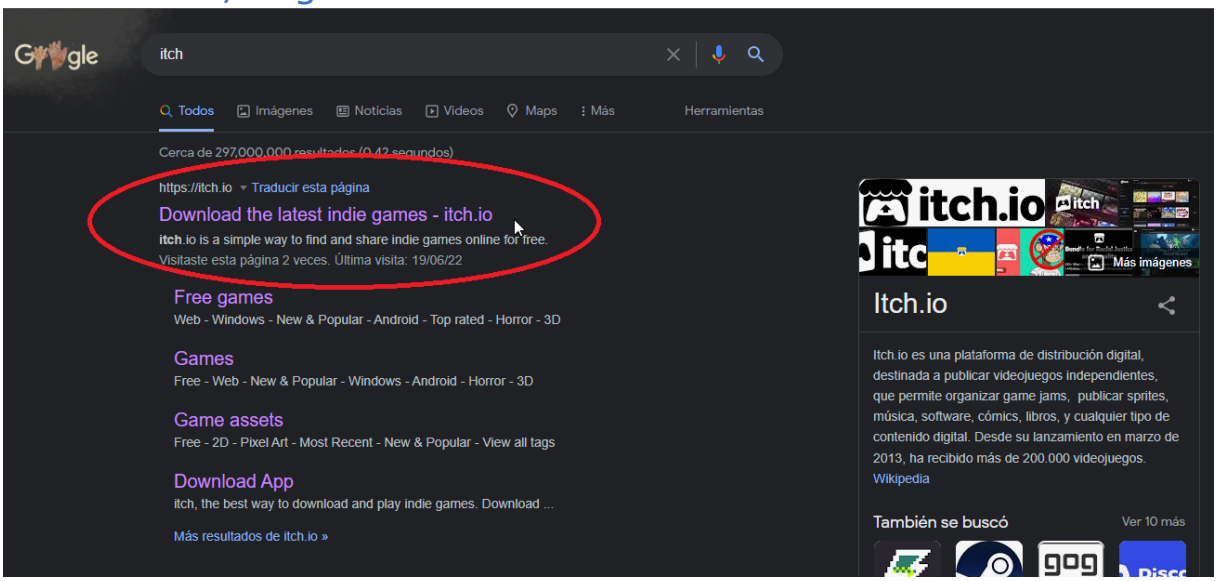

A continuación los casos de prueba serán identificados con el siguiente formato:

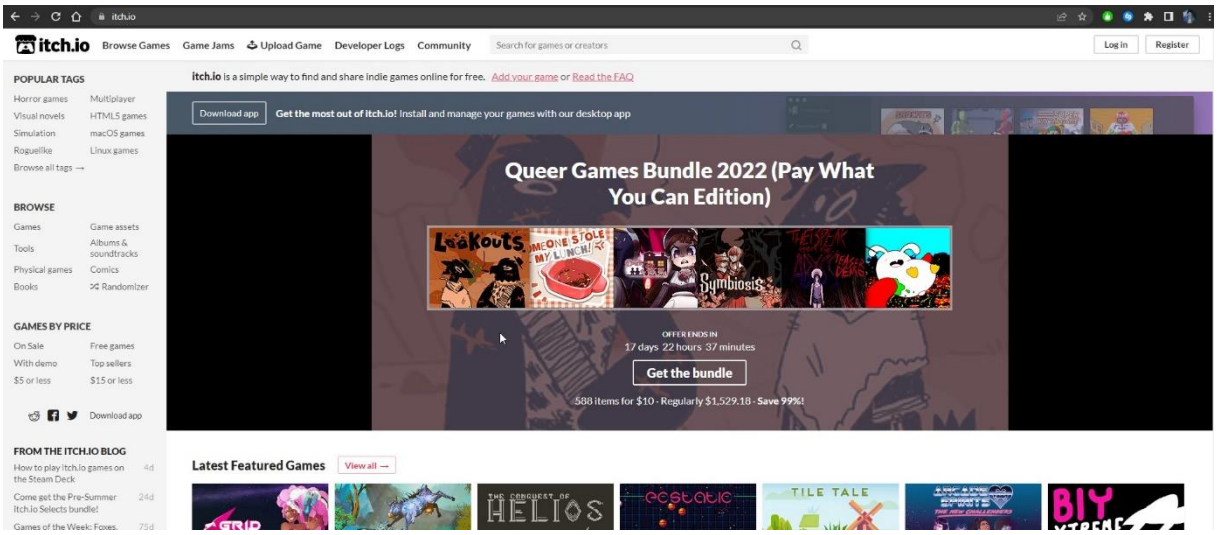

- **Caso00X-D / ID**
- **Caso00X-M / ID**

Los números indicando el orden en el que se realizaron los casos, la “D” indicando si se realizó en una pc de escritorio, “M” si se realizó en un dispositivo móvil y el ID correspondiente en el Excel con los casos de prueba.

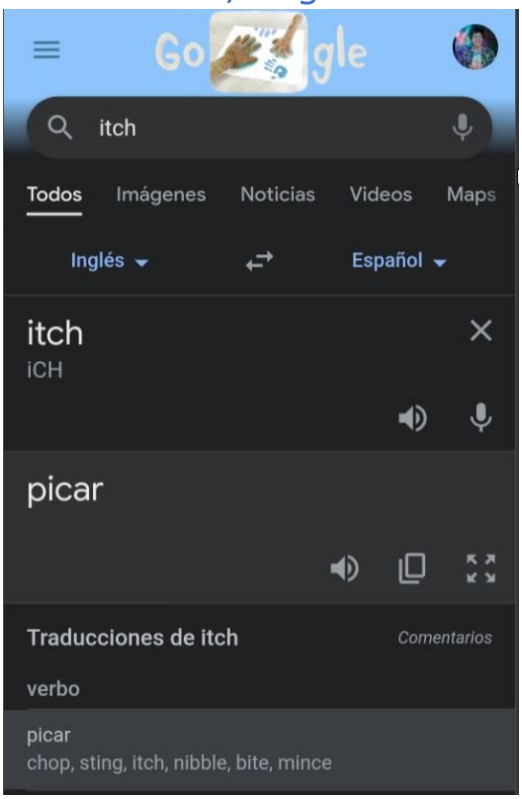

Los casos realizados en pc de escritorio se realizaron en un sistema operativo de 64 bits Windows utilizando el navegador “Google Chrome” en su versionado 102.0.5005.115 y el dispositivo móvil utilizado fue un Motorola “Moto g5s plus” con android 8.1.0 con el buscador “Google Chrome” en su versión 102.0.5005.125.

Revisión general del sitio

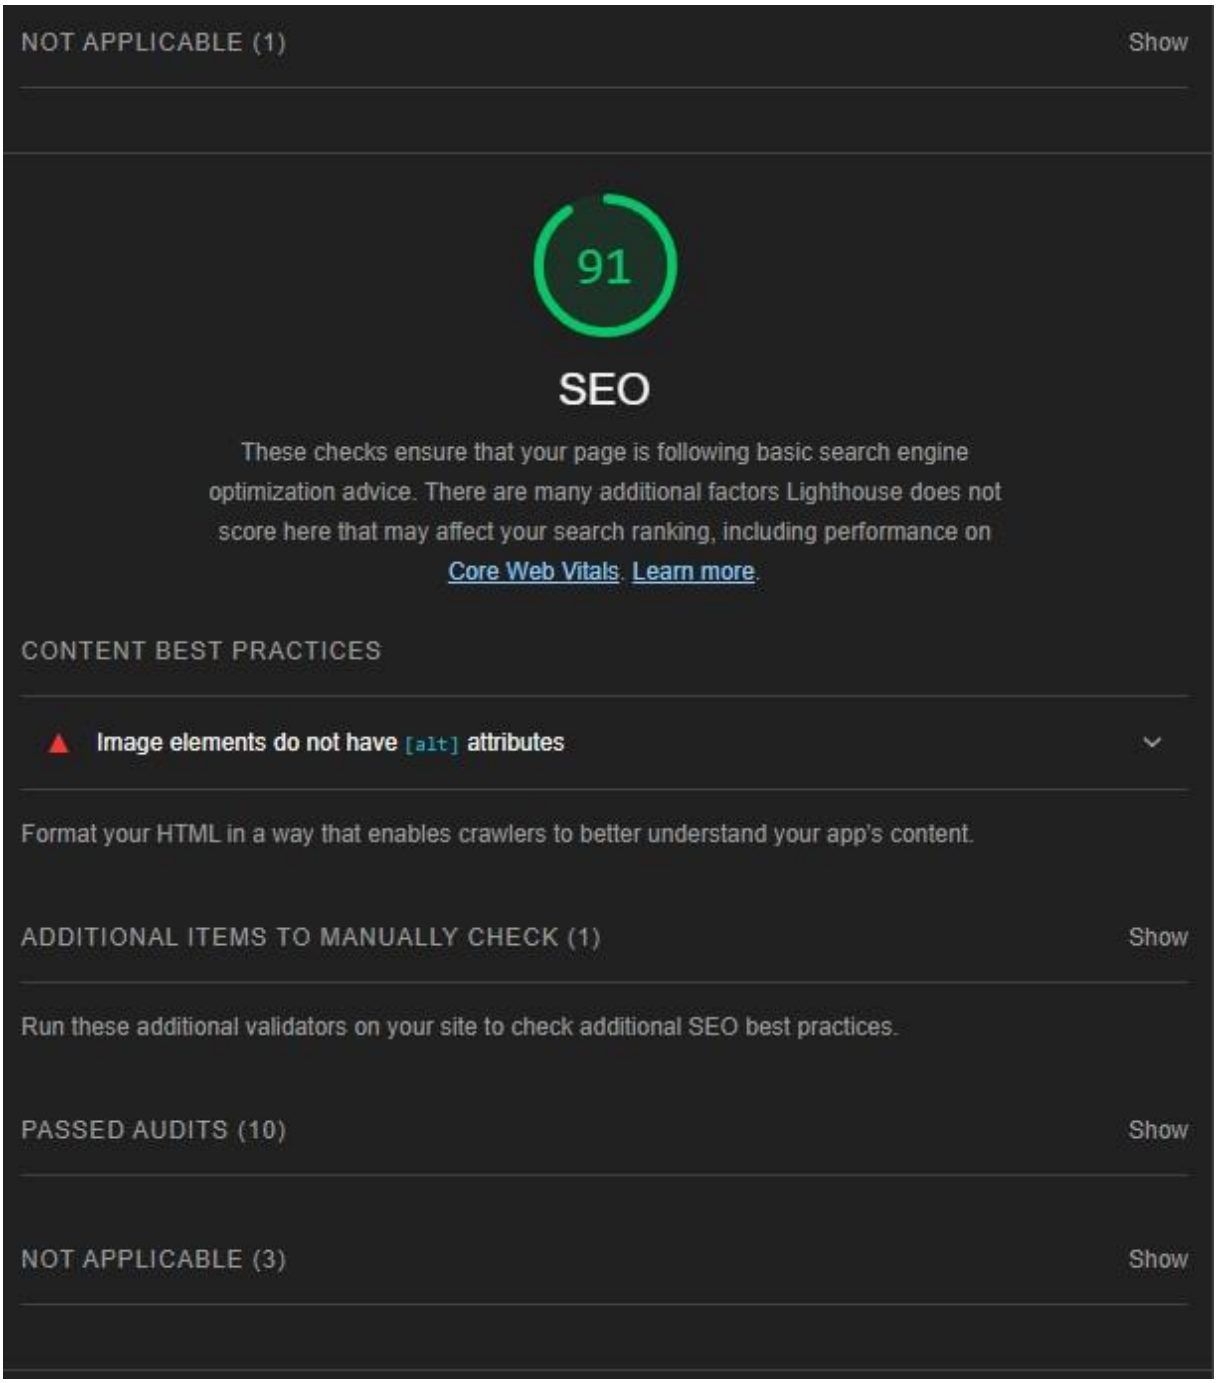

Se utilizó la herramienta “Lighthouse” integrada en la consola de Chrome para realizar pruebas de estrés y del SEO de la página.

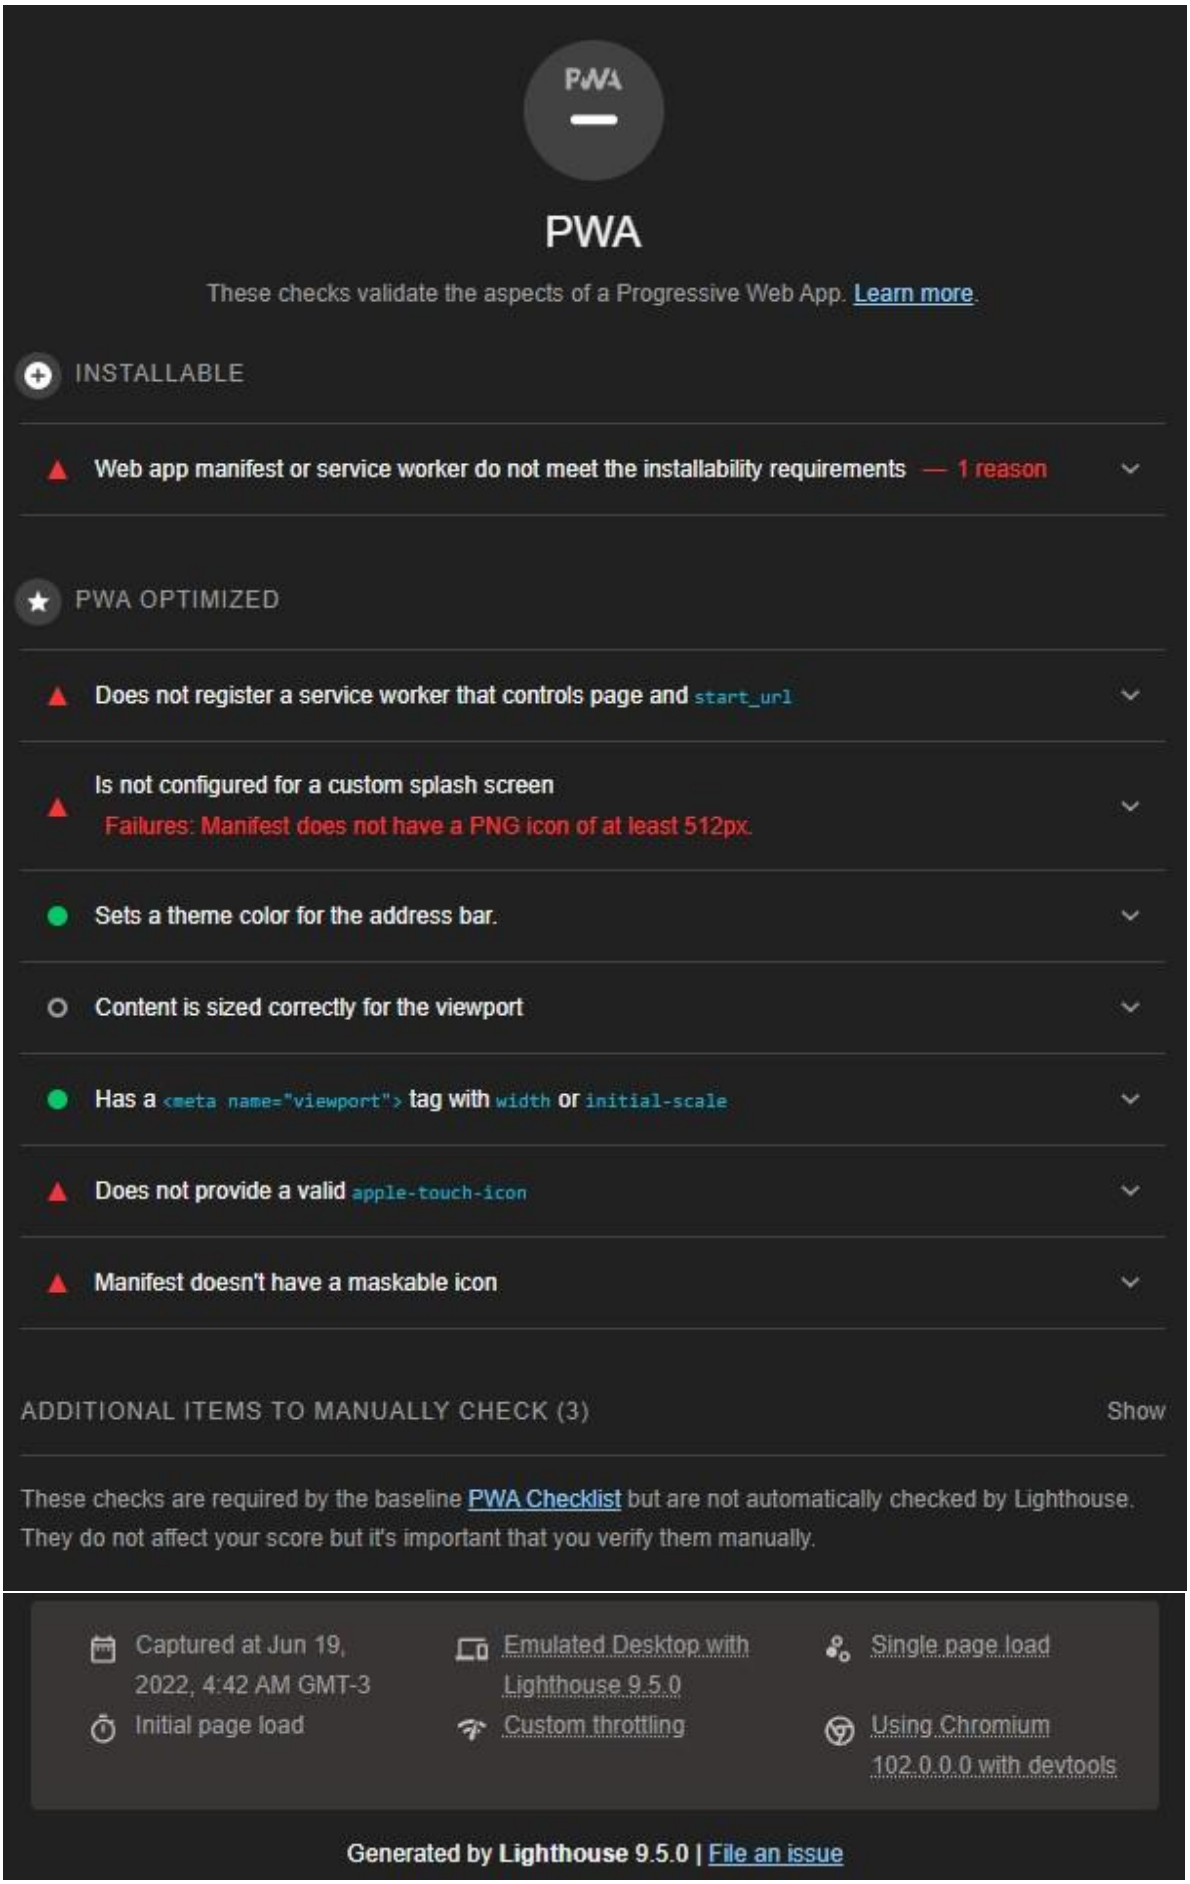

Show audits relevant to: All FCP TBT LCP CLS
OPPORTUNITIES
Opportunity
Estimated Savings
Serve images in next-gen formats 0.48 s
Eliminate render-blocking resources 0.33 s
Properly size images 0.28 s
These suggestions can help your page load faster. They don't directly affect the Performance score.
DIAGNOSTICS
Ensure text remains visible during webfont load
Image elements do not have explicit width and height
Serve static assets with an efficient cache policy — 28 resources found
Avoid an excessive DOM size — 1,377 elements
Avoid chaining critical requests — 6 chains found
Keep request counts low and transfer sizes small — 41 requests • 1,200 KiB
Largest Contentful Paint element — 1 element found
Avoid large layout shifts — 5 elements found
Avoid long main-thread tasks — 2 long tasks found

PASSED AUDITS (28)
Show
80
Accessibility
These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.
ARIA
[aria-*] attributes do not have valid values
These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.
NAMES AND LABELS
Image elements do not have [alt] attributes
Links do not have a discernible name
These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST
Background and foreground colors do not have a sufficient contrast ratio.
These are opportunities to improve the legibility of your content.
ADDITIONAL ITEMS TO MANUALLY CHECK (10)
Show
These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

PWA
These checks validate the aspects of a Progressive Web App. Learn more.
INSTALLABLE
Web app manifest or service worker do not meet the installability requirements — 1 reason
PWA OPTIMIZED
Does not register a service worker that controls page and start_url
Is not configured for a custom splash screen
Failures: Manifest does not have a PNG icon of at least 512px.
Sets a theme color for the address bar.
Content is sized correctly for the viewport
Has a <meta name="viewport"> tag with width or initial-scale
Does not provide a valid apple-touch-icon
Manifest doesn't have a maskable icon
ADDITIONAL ITEMS TO MANUALLY CHECK (3)
Show
These checks are required by the baseline PWA Checklist but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.

También se utilizó https://pagespeed.web.dev/ para realizar pruebas de estrés.

En dispositivos móviles.

OPORTUNIDADES

Oportunidad	Ahorro estimado
▲ Publica imágenes con formatos de próxima generación	2.3 s
▲ Elimina los recursos que bloqueen el renderizado	1.75 s
▲ Reduce el código CSS sin usar	0.9 s
▲ Reduce el código JavaScript sin usar	0.89 s

Estas sugerencias pueden hacer que tus páginas se carguen más rápido. No afectan directamente la medición del rendimiento.

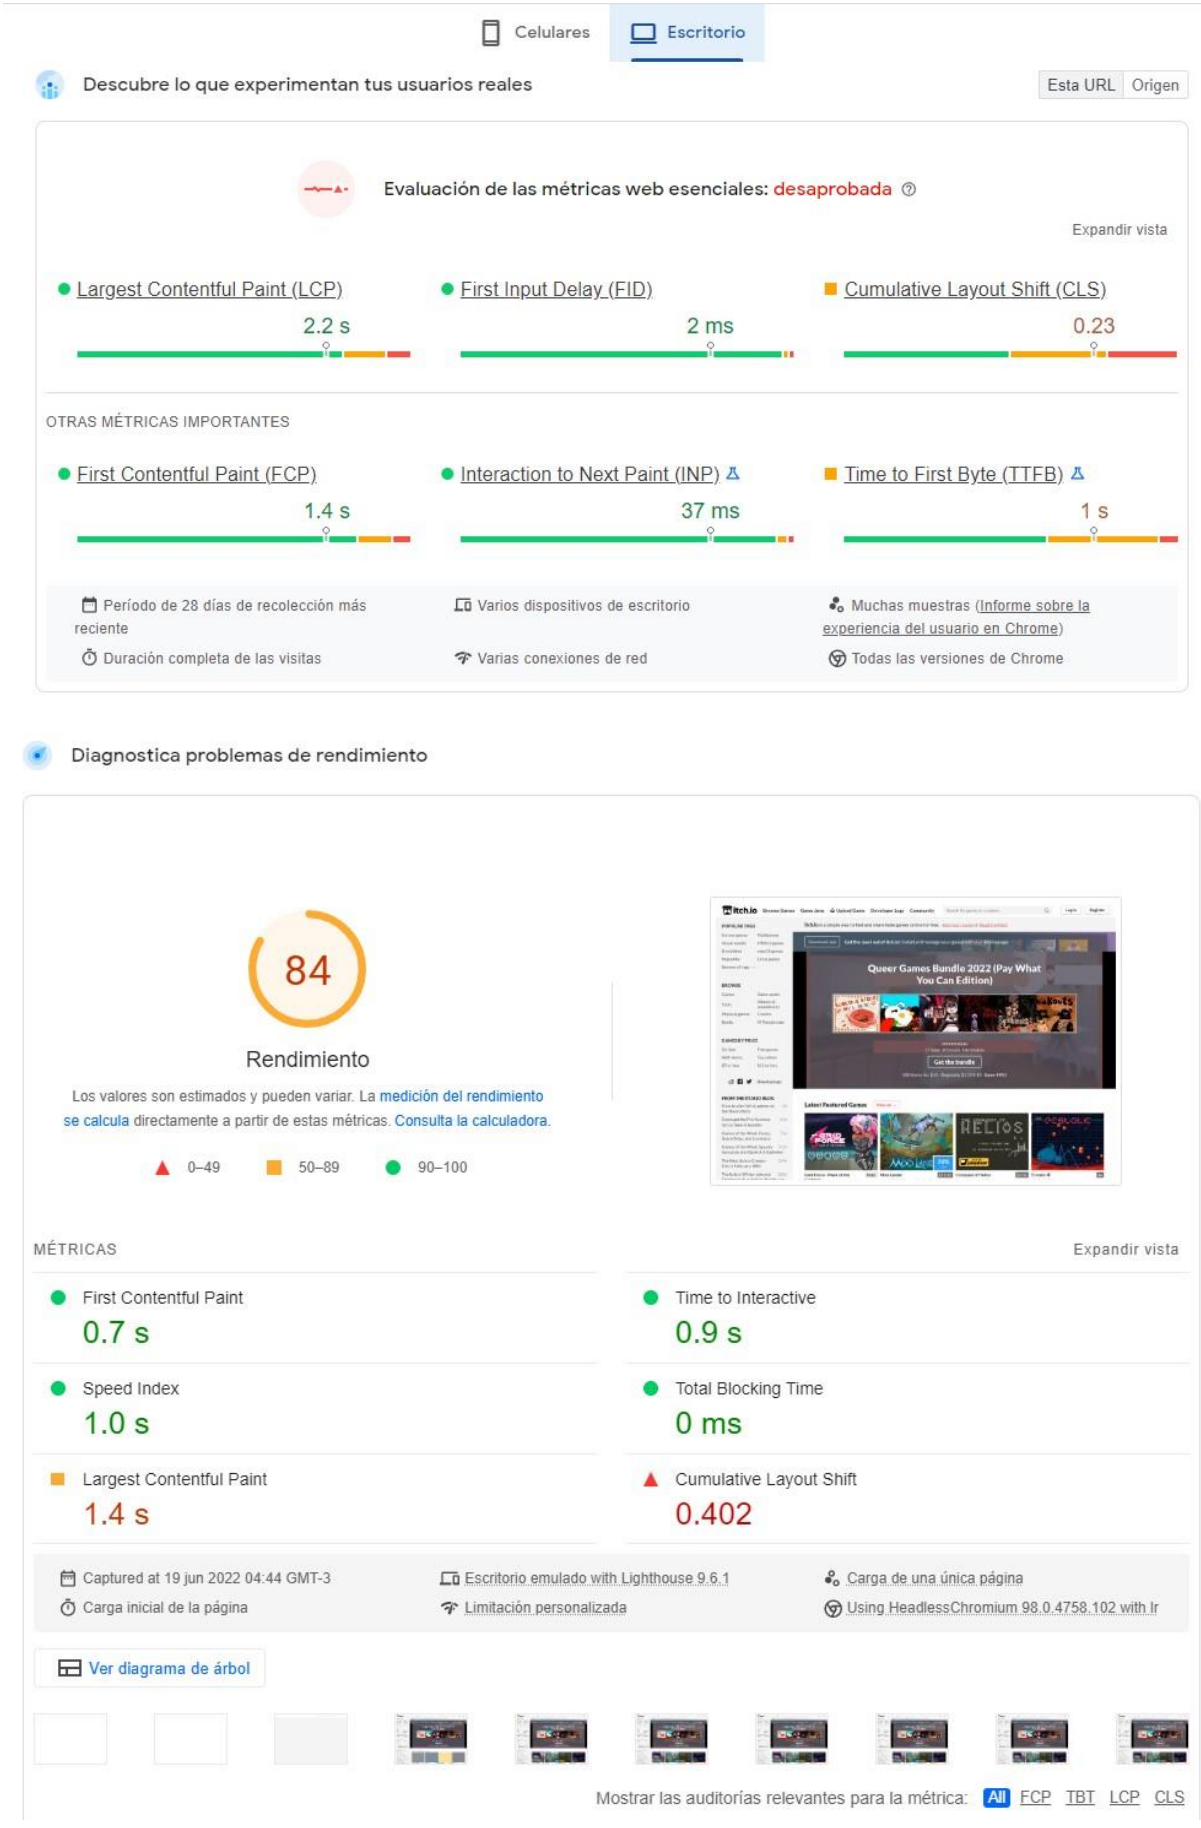

DIAGNÓSTICO

- ▲ Asegúrate de que el texto permanezca visible mientras se carga la fuente web
- ▲ Los elementos de imagen no tienen ningún atributo `width` ni `height` explícito
- ▲ Publica elementos estáticos con una política de caché eficaz — Se encontraron 21 recursos
- ▲ First Contentful Paint (3G) — 5264 ms
- ■ Evita un tamaño excesivo de DOM — 1,368 elementos
- ○ Evita encadenar solicitudes críticas — Se encontraron 6 cadenas
- ○ Asegúrate de que la cantidad de solicitudes y los tamaños de transferencia sean reducidos — 24 solicitudes • 953 KiB
- ○ Elemento del Procesamiento de imagen con contenido más grande — Se encontró 1 elemento
- ○ No realices cambios grandes en el diseño — Se encontraron 5 elementos
- ○ Evita tareas largas en el subproceso principal — Se encontraron 8 tareas largas

Obtén más información sobre el rendimiento de tu app. Estos números no afectan directamente la medición del rendimiento.

Conclusiones

Como resultado final la página tuvo mal rendimiento en pruebas de performance para mobile pero un buen resultado en pruebas de SEO. Sin embargo la página presenta pocos errores dentro de su uso regular.

Así como muestra el grafico de los 19 casos de prueba el 79% de los casos tuvieron un resultado positivo.

Se puede observar que los errores corresponden más a una cuestión estética más que funcional de la página y por lo tanto no presentan tanta urgencia. Se debe de centrar los esfuerzos principalmente sobre la optimización de la página para dispositivos móviles.
